

# AVS100HD User Manual

## Function:

The AVS100HD AV integration module offers up to 3 room distribution of up to 3 component or composite video signals with accompanying audio. RCA type connections are used for input/output. NOTE: This unit does not up-convert or down-convert signals and therefore must be used entirely in component or entirely in composite mode.

## Operation:

The unit has a single button on the front to turn it on or off. There is single source control button for each TV connected (TV1, TV2, and TV3). Pressing the button for a particular TV will advance the source selection for that TV set from SAT to DVD to AUX in a cyclic fashion.

## Parts included:

AVS100HD-01 (main unit)      Size: WxHxD (depth is without connections made): (8" x 2.75" x 6")  
AVSPA5-01      (AC/DC power pack with 2 pin AMP connector)

## Power and fuse information:

The unit requires 12VDC supply power and comes standard with an AC/DC power pack. Power is given final operating DC regulation within the unit internally. The module has a field serviceable 1 amp fuse (4mm by 20 mm standard glass body, fast-acting) located inside of the case.
